Projects

Amazon Clone
it is a simple Amazon Clone using HTML, CSS. In this clone i try to copy the UI of Amazon .

Travel Website
Travel website, built with HTML, CSS, and JavaScript, offers users an immersive exploration of global destinations. Features include interactive destination pages, search and filter options, responsive design for all devices, booking integration, interactive maps, and social sharing. The project aims to provide a seamless and inspiring travel experience for users.

Portfolio website
Portfolio website, crafted with HTML, CSS, and JavaScript, serves as a dynamic showcase of our skills and accomplishments. It features a clean and modern design, intuitive navigation, and responsive layout for optimal viewing across devices. Key elements include sections highlighting projects, skills, and contact information. The website aims to impress visitors and provide a comprehensive overview of our capabilities and experiences.

ToDo list app

Todo List application

Todo List application, developed using HTML, CSS, JavaScript, and React.js, provides users with a streamlined way to organize tasks. With a clean and intuitive interface, users can easily add, edit, and delete tasks. The application offers real-time updates and responsiveness, ensuring a seamless user experience across devices. Features include task prioritization, due dates, and filtering options. The Todo List aims to boost productivity and task management efficiency for users.
